

Iteration 0 meeting minutes

We had a meeting for an hour and assigned tasks to each other to make studs like so:

A screenshot of a Slack conversation thread. On the left, there are four avatars: DD (Daniel Duncan), LK (Lakshaya Kaushik), AT (Abhedhya Thapa), and DF (Daniel Field). The messages are as follows:

- DD** (9:11 pm): channelsCreateV1, channelJoinV1
- LK** (9:12 pm): channelDetailsV1
- AT** (9:12 pm): authLoginV1 and authRegisterV1
- DF** (9:12 pm): channelsListV1 and channelsListAllV1
- RC** (9:13 pm): channelInviteV1 and channelMessagesV1

Each message has a "Reply" button below it.

Then while we were on call we made relevant branches and did our relevant studs

Creating a merge request like so,

And solved any merge conflicts that had come up
